RISK COMMUNICATOR / METEOROLOGIST

Due to expansion of operations in Europe we are looking to employ graduates in meteorology or experienced forecasters to work from our Soest office in the Netherlands. We are seeking weather forecasters to provide forecasts for the renewable energy, shipping, oil and gas industries. Working on a 24/7 shift basis you would become part of our Soest based EU team of meteorologists and also have the opportunity to work closely with the global Weathernews forecast centres.

Essential Requirements

- Formal university degree in meteorology or equivalent experience in forecasting
- Enthusiasm to Weathernews' vision and ability to think and work as a global team
- Customer focus – creating value in service together with customers
- Excellent communication skills, in both written and spoken English
- Willingness to work shifts (including weekends, evening and nights).
- Able to go international business trip (sometimes with short notice)
- EU residency/EU work permit

Location : Soest, the Netherlands
Starting Salary : € 2.500 per month (excluding shift and vacation allowance)
Working Hours : 40 hours per week

Closing Date : 28 November 2016

This is an exciting opportunity to join our team and begin a rewarding career in weather forecasting. Interested applicants should send a detailed copy of your C.V. and a covering letter together with your enthusiasm for working at Weathernews to: recruitmentsoest@wni.com

For additional information you can visit our corporate website: <http://global.weathernews.com/>

We are not interested in services offered by any recruitment agency. Acquisition is not appreciated.

About Weathernews Inc.

Weathernews Inc. is the world's largest private weather company, based in Japan with 5 service/operation centres and 31 sales/marketing offices in 19 countries with over 700 staff worldwide. Weathernews delivers customized, risk communication services to businesses and individuals whose lives or livelihoods are affected by the weather. With over 3,000 business customers and 1.5 million wireless subscribers worldwide, the company consistently evaluates and evolves existing applications for weather information while exploring additional markets and industries which would benefit operationally and financially from specific weather information and delivery methods. Currently, Weathernews delivers weather information, analysis and risk communication services to some of the largest companies in aviation, marine, ocean offshore, media, retail, and rail industry.
